

# How To Set Up VPNC on Linux Mint 17.2

Written on August 4, 2016

## 1 Install VPNC

Open your terminal. Type `<sudo apt-get install vpnc>`

## 2 Open VPNC and start the connection

Because you also need super user rights for opening VPNC, type `<sudo vpnc>` At least starting the connection:

1. *Enter IPsec gateway address: `<home-rz.vpn.uni-freiburg.de>`*
2. *Enter IPsec ID for `home-rz.vpn.uni-freiburg.de:<home>`*
3. *Enter IPsec secret for `home@home-rz.vpn.uni-freiburg.de:<home>`*
4. *Verify your student status by typing your UNI-ID with the addition `@uni-freiburg.de` and eduroam-password (RAS-password) (a) Enter username for `home-rz.vpn.uni-freiburg.de:mm111`  
(b) Enter password for `mm111@home-rz.vpn.uni-freiburg.de:password`*

FINISH!
